

Ziad Ibrahim Mohamed

Location: Cairo, Egypt

LinkedIn: <https://www.linkedin.com/in/ziad-ibrahem->

Professional Summary

Highly motivated and innovative professional with a unique blend of engineering acumen in Python and C++, advanced AI capabilities in Google Gemini prompt engineering, and creative design expertise in Figma and multimedia. Adept at developing robust technical solutions and crafting engaging visual experiences. Eager to leverage a diverse skill set to contribute significant value to a forward-thinking technical team.

Core Skills

Technical & Programming: Python (Simple Data Structures, Control Structures, Loops), C++, Basic AWS Robotics
AI & Prompt Engineering: Google Gemini
UI/UX & Multimedia: Figma, UI/UX Prototyping, Multimedia Specialist
Business & Data Analysis: Business Intelligence, Data Analysis

Projects & Experience

Independent Developer & Multimedia Designer

- **Developed** foundational programming solutions using Python and C++, demonstrating proficiency in data structures, control flow, and iterative processes.
- **Designed** intuitive user interfaces and engaging multimedia content with Figma, applying UI/UX prototyping principles to enhance user experience.
- **Engineered** AI-driven solutions through Google Gemini prompt engineering, optimizing interactions for specific outcomes.
- **Implemented** basic robotics functionalities leveraging AWS, showcasing an understanding of cloud-based robotic systems.
- **Collaborated** on various projects, applying strong communication skills to ensure seamless team integration and project success.

Education

Helwan National University *Multimedia/Technology Focus*

Certifications

- **"Link" Program - Business Intelligence and Data Analysis** (eYouth, May 2026)
- **Build with AI: Masr Edition** (Google for Developers & ITI, 2026)
- **Introduction to Robotics on AWS** (AWS Training, January 2026)
- **Python Learning Path: Programming Foundations** (CodeSignal, January 2026)
- **Python Learning Path: Introduction to Simple Data Structures** (CodeSignal, January 2026)
- **Python Learning Path: Mastering Control Structures** (CodeSignal, February 2026)
- **Python Learning Path: Exploring Iterations and Loops** (CodeSignal, February 2026)
